

QAbstractTableModel

std::vector< exampleDefine
::example1LogData >

TExample1LogModel

```
classDiagram
    TExample1LogModel --|> QAbstractTableModel
    TExample1LogModel --> std_vector_exampleDefine_example1LogData
```

The diagram illustrates the relationship between three classes. At the bottom is the class `TExample1LogModel`, which is shaded gray. Two blue arrows originate from its top edge. One arrow points diagonally up and to the left to the class `QAbstractTableModel`. The other arrow points diagonally up and to the right to a class containing the text `std::vector< exampleDefine ::example1LogData >`. All three class boxes have a thin gray border.
